Injustice 2 legendary edition characters missing

So this is not necessarily a new issue. I've heard it repeated by several people, but most of them have a particularly interesting story about buying it second hand from some guy like 2 days ago or whatever, so I figured I'd submit this and see if I can't get any help on it. I got legendary edition on record, new, at launch on PS4. I played it for a while then, but dropped it for a few months until now. Now that all the DLC characters are out, and I have a fight stick, Thought I'd check it out again. But I don't have any of the DLC characters, meddetag for Red Hood and Darkseid, the two that came out while I was playing the game. The game tells me that I need to buy additional characters. I understand that some people have seen success just letting the game download characters, but after leaving the game run for 4 hours, as well as rebooting it dozens of times and holding it off for a while, I'm not sure what else I can do. Is my disk just dysfunctional? Any help would really be appreciated. I received the Legendary Edition as a gift a few days ago, and I checked what it was supposed to include. It seems it should include DLC characters (Darkseid, Red Hood and so on), but I can't find a way to get them. Of course, they are not available for use in any game mode, and when I check the buy/download menu I can only buy them. I don't see any way to download or redeem them. I also noticed something strange, it's appearing as a regular Injustice 2 in my library, while it says Legendary Edition in the actual game main menu. Any idea what's wrong? Thanks in advance.
